2005 Price List

Classic KISS Rebreather Kit - \$5,200.00 USD

This includes everything except the 3 sensors, two tanks and a BCD or Harness. Any BCD/Harness that has the bolt holes in the back can be used. The tanks should have a set of lefthand/righthand valves. We recommend 2 liter tanks. For sensors, we have used both the Teledyne R22-ATT and R22-D. The R22-D sensors are the ones Teledyne now recommends for diving applications.

Crating & Handling Fee, Classic KISS - \$30.00 USD

Shipping for the Classic KISS Rebreather Kit : We courier via an international shipping company, airport to airport. Once the shipment lands at the airport, you, the client will be contacted for further instructions. You can either pick up the order at the airport or choose to have it delivered on. To most places, we ship collect. This way, there is absolutely no markup on the shipping costs. You are paying the exact fee. On top of the shipping fee, you will also be responsible for any taxes, duties and brokerage fees. These charges usually need to be paid for when the unit is picked up or delivered. Please note that we will only ship the rebreather kit fully insured.

For areas where shipping collect is not an option, shipping will have to be paid in advance with the purchase of the rebreather kit. We will need your complete shipping address in order to provide you with a proper quote. Also, we will need the name of the airport where you would like to pick the unit up. When the unit arrives, you will still have the option of picking the unit up at the airport or having it delivered on. Any extra delivery, taxes, duties and brokerage fees will be an extra charge. Our fee covers the courier and full insurance to your airport. These extra charges usually need to be paid for when the unit is picked up or delivered.

Sport KISS Rebreather Kit, Complete - \$4,780.00 USD

This includes the complete rebreather, 3 K1D sensors, Oxycheq 40# Kiss Wing and A-Pac Harness, 2 Aluminum 13 cuft tanks with modular lefthand/righthand valves.

Sport KISS Rebreather Kit - \$4,000.00 USD

This includes the complete rebreather and 3 K1D sensors, but no harness/wing and no tanks.

Crating & Handling Fee, Sport KISS - \$15.00 USD

Shipping for the Sport KISS is via UPS, collect where ever possible.

DSV (Mouthpiece) - \$675.00 USD

With open circuit bailout.

Sensor Block & Display, Classic KISS - \$950.00 USD

Triple Display & 3 Hose Connector, Sport KISS - \$838.00 USD

Display Segment Including Hose - \$250.00 USD

On the Kiss Rebreather, there are three displays segments.

Manual Add Valve - \$250.00 USD Filter - \$100.00 USD Plug - \$8.00 USD Adapter - \$15.00 USD

The 15 micron filter should be used on the inlet of the valve. It is from Swagelok, #SS-4F-T7-15. This item could be cheaper if you purchased it from your home country. The fittings on the valve are 1/16 NPT with adaptors to 1/4 Swagelok tube. Jetsam uses SS-4BHT-XX Teflon/stainless Swagelok hoses. These hoses come in various lengths and can be ordered directly from Swagelok. The plug is to convert the Apeks regulator to absolute pressure. The adapter is from 1/8 LP to 1/8 NPT and makes it easier to connect the Swagelok hoses to the first stage regulator.

Loop Hoses - \$35.00 USD each

These hoses come in either 22" or 17" lengths.
